NO. 6584 P. 3

()

- 12 -

CLAIMS:

- 1. A rotating electrical machine comprising:
 - a housing;
- a shaft mounted rotatably within the housing;
 - a rotor fixed to the shaft and providing a magnetic field;
 - a stator positioned about the rotor within the housing and having a winding;
- a switch mounted with the housing and having a first 10 position for allowing current in one direction through the winding and a second position for allowing current in an opposite direction through the winding;
 - a mechanical activator movable by the shaft and acting on the switch so as to move it between the first and second positions when the winding is so aligned that currentinducing effects of the magnetic field on the winding are at or near a minimum.
- 2. A rotating electrical machine comprising: 20
 - a housing;
 - a shaft mounted rotatably within the housing;
 - a rotor fixed to the shaft and having a plurality of poles made of ferromagnetic material;

NO. 6584 P. 4

- 13 -

a stator positioned about the rotor within the housing and having a winding;

a switch mounted within the housing and having a first position for allowing current in one direction through the winding and a second position for allowing current in an opposite direction through the winding;

a mechanical activator movable by the shaft and acting on the switch so as to move it between the first and second positions.

- 3. The electrical machine of claims 1 or 2 wherein the switch has a third position for not allowing current through the winding, and the mechanical activator moves the switch to the third position between the first and second positions.
- 4. The electrical machine of any one of claims 1 to 3 wherein the mechanical activator comprises a cam mounted about the shaft and a cam follower communicating with the cam and with the switch.
- 5. The electrical machine of claim 4 wherein the cam has four portions for moving the switch to the first position for $1/6^{th}$ of a cycle and then to the third position for $1/3^{rd}$ of the cycle, and then to the second position for
